

SMARTFLEX™
MINI-SPLIT
SINGLE-ZONE
SYSTEMS

Z Series – 28 SEER

FIT MORE COMFORT INTO MORE PLACES

Space-saving, energy-saving **SmartFlex™ Z Series** mini-split single-zone systems are the perfect comfort solution for room additions, remodels, and other spaces. They eliminate the cost and hassle of installing ducts and let you dial in the exact temperature and humidity you need.

A sound investment

Superb energy savings. Ductless mini-split systems deliver just the right amount of heating and cooling to the space, using no more energy than necessary. With efficiency ratings among the industry's highest, they can save up to 30 percent over typical central air conditioning systems.

A breeze to install. You can use the same wiring as your regular household devices and appliances, saving installation costs and limiting disruption of your home.

Right at home in your home

Convenient control. Choose a wireless remote or wall-mounted zone controller. With a “comfortable sleep” mode and a timer function, you can easily set temperatures by time of day.

Cozy all winter. Mini-split heat pumps offer “cold blow” prevention: The fan is delayed slightly at the start of each cycle to make sure the air always comes out warm.

Comfort at your fingertips. An optional “I Feel” function on the wireless remote “tells” the indoor unit the temperature at the remote control, optimizing room comfort.

Easy on the ears and eyes. Conditioned air is delivered whisper-quiet. Slim-profile heating/cooling units look great; compact size lets them fit in perfectly.

CHOOSE THE PERFECT SOLUTION

Your **SmartFlex™** Mini-Split System includes an outdoor unit that delivers refrigerant to an indoor unit in your chosen room. The indoor unit then supplies heated or cooled air in only the amount needed to keep the room temperature you set. Ductless mini-splits are ideal substitutes for bulky, noisy window air conditioners.

They are especially well-suited for:

Older homes. Add heating or cooling in a chosen space without altering architectural details or special design elements.

Additions. Heat or cool a new space without a costly upgrade to an existing system.. Absence of ducts gives you more design freedom and saves money.

Problem rooms. Cost-effectively turn consistently too-warm or too-cool rooms into cozy, comfortable spaces.

Attics and garages. Add living spaces at an affordable cost with minimal disruption. Heat and cool the space only when in use.

Single room:

Choose a single-zone mini-split system for individualized comfort.

Room addition:

A single-zone unit is ideal for sunrooms or other additions where an unsightly window unit or ductwork is not practical.

YOUR CERTIFIED COMFORT EXPERT

Your **SmartFlex™** dealer is a home comfort professional, trained to help you select the **SmartFlex** Mini-Split System that fits your home exactly. Our Certified Comfort Expert™ (CCE) Dealers are part of a national network of independent businesses with proven records of success in providing complete customer satisfaction.

Satisfaction Guaranteed

Working with a **SmartFlex** CCE Dealer means your mini-split system is backed with a 100% Satisfaction Money-Back Guarantee. After installation, your dealer will be there with dependable service to make sure your system keeps working perfectly.
